**Spray Characteristics**
- Produces a uniform, flat spray without hard edges.
- Tapered edges of pattern allow overlapping for even distribution.
- Impact of spray is generally greater with narrower spray angles assuming equal flow rates.

**Construction and Materials**
- 3 piece design with Male BSPT Thread or Welding Nipple body, available in:
  - Brass.
  - Stainless Steel.
  - Mild Steel (Welding Nipple body only).
- Other materials available to special order.

**Order Example**
- LA 80-65° Stainless Steel – Tip Only.
- LAH 60-80° Brass = Complete Assembly.
- LAH 100-90° Stainless Steel = Welding Assembly.

**Dimensions and Weights**
